## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1, 3-7 and 18 are allowed.
2. The following is an examiner's statement of reasons for allowance: With respect to independent claims 1 and 18, the instant invention is directed to a method for classifying a media collection and a system for video indexing and delivery. The relevant prior art of record, such as **Cobbley et al (5,818,510)** discloses method and apparatus for providing broadcast information with indexing. **Maybury et al (6,961,954)** disclose automated segmentation, information extraction, summarization and presentation of broadcast news **Hooks et al (6,169,542)** disclose method of delivering advertising through an interactive video distribution system. **Dimitrova (6,363,380)** disclose multimedia computer system with story segmentation capability and operating program therefor including finite automation video parser. **Miller (6,064,438)** disclose video indexing protocol. **Menard et al (6,061,056)** disclose television monitoring system with automatic selection of program material of interest and subsequent display under user control. However, neither **Cobbley, Maybury, Hooks, Miller nor Menard** and any of the cited references teach or suggest, alone or in combination the feature of "...classified program content versus classified television commercials, where the television commercials are presented chronologically separate from the program content and in a same display screen as the program content..." as recited in combination with other features of independent claims 1 and 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hoffert et al (5,983,176) disclose evaluation of media content in a media file.

Cragun et al (5,859,662) disclose apparatus and method for selectively viewing video information.

Peckover (6,119,101) disclose intelligent agents for electronic commerce.
